

Safa Hajji

Full-stack developer and software engineering student specializing in AI-driven solutions and scalable web applications. Currently building R&D tools at QFISH in Agile environments. Experienced in end-to-end development with Angular, Spring Boot, Python, and machine learning integration. Proven ability to deliver complex projects from intelligent platforms to blockchain-enabled systems.

WORK EXPERIENCE

QFISH, Remote (Sweden)

Full-Stack Developer June 2025 – Present

- Built R&D software tools and full-stack web applications in Agile-Scrum, participating in sprint planning, code reviews, and CI/CD pipelines
 - Developed AI-driven data processing pipelines integrating machine learning models with scalable backend architectures
 - Collaborated with cross-functional teams to deliver production-ready features with high code quality standards
- Mobile Application Developer – Tunisie Télécom Tunis, Tunisia – Jul–Aug 2023
- Developed Android application using Java and XML, implementing backend logic and designing intuitive UI/UX features.
 - Applied Material Design principles and collaborated with senior developers to ensure code quality and best practices.

EDUCATION

Ibn Khaldoun High School – Baccalaureate in Mathematics

2022–2027

PROJECT

Workify

Jan 2026 - present

- Designed and developed an intelligent web platform connecting freelancers and project owners, integrating AI-driven user profiling, personalized learning paths, and trust-based evaluation. Implemented smart project management, messaging, ticketing, online payments, and training certification, with machine learning models for skill extraction, requirement analysis, and recommendation systems to enhance matching accuracy and platform reliability. tools – Angular, Spring Boot, REST APIs, Machine Learning (NLP, Recommender Systems), Python, FastAPI, Jira, Git LabTrack Pro Aug 2025 - present
- Extended an existing web application used by an NMR center to support laboratory workflows and sample traceability. Implemented multi-step analysis tracking (harvest, NMR, GC-MS, PCA), quality score cards, and immutable batch certification using blockchain, improving data integrity and usability for lab staff. tools – FastAPI, Python, Svelte, SQLite, PCA (scikit-learn), NMR & GC-MS data processing, Blockchain (NFT), Git NMR-GA June - July 2025
- Developed a Python-based analytical toolkit using genetic algorithms to process NMR spectra and estimate substance concentrations, focusing on optimization, signal fitting, and quantitative analysis of complex chemical data. tools – Python, Genetic Algorithms, NMR data processing, NumPy, SciPy Nutrifit Oct - Dec 2024
- Created a cross-platform mobile application for personalized nutrition and fitness tracking, allowing users to monitor health goals, dietary habits, and physical activity. tools – FlutterFlow, Mobile App Development, UI/UX Design Tbibi Feb - May 2025
- Developed a medical consultation and appointment management platform with secure user roles, scheduling features, and integrated Google Meet links for remote consultations. tools – Symphony, JavaFX, PHP, Java, REST APIs, Google Meet API Alemni Feb - May 2024
-

Built an educational web platform enabling course management, user authentication, document sharing (PDF), and an AI-powered chatbot to assist learners and improve engagement. tools – PHP, JavaScript, HTML/CSS, MySQL

SKILLS

- Web Development: JavaScript (React, Angular, Svelte), Python (FastAPI), PHP (Symfony), Java (Spring Boot, web apps), C# (web apps), HTML/CSS, Shell Scripting
- Mobile Development: Java (Android), Dart (Flutter, FlutterFlow)
 - Databases: SQL: MySQL, Oracle NoSQL: MongoDB, Neo4j
 - Desktop / GUI: C++ (Qt), Java (JavaFX)
 - Cloud & DevOps: Azure, AWS (basics), Docker, Kubernetes, Jenkins, CI/CD, DevOps practices
 - Data & AI: Genetic Algorithms, Pytest, BDD Testing
 - Embedded Systems: Arduino, PIC Microcontrollers
 - Methodologies & Tools: Agile, Scrum, Git, GitHub, MySQL Workbench
 - Operating Systems: Linux (Ubuntu), Windows
- CERTIFICATIONS
- MongoDB Aggregation Fundamentals Jan 2026
 - Graph Data Modeling– Neo4j Dec 2025
 - Neo4j Graph Data Science Dec 2025
 - Cypher Fundamentals– Neo4j Dec 2025
 - Neo4j Fundamentals Nov 2025Intro to AI– 365 Data Science Nov 2025
 - AI Model Deployment on AWS– 365 Data Science Nov 2025
 - Languages
 - Arabic (C2) | English (C1) | French (B2) | German (A1 , actively learning)
