

Safa Hajji

Full-stack engineering student specializing in Angular, Spring Boot, and Python, with hands-on experience in designing and implementing AI-driven applications, data processing pipelines, and scalable backend architectures. Experienced in building end-to-end systems integrating machine learning models, workflow automation, and structured data analysis. Currently contributing to R&D projects in Agile environments with a focus on scientific data processing and intelligent system design. Exchange student in Germany, seeking industry experience in software engineering and AI-based systems.

WORK EXPERIENCE

QFISH, Remote (Sweden)

Full-Stack Developer

June 2025 – Present

- Built R&D software tools and full-stack web applications in an Agile-Scrum environment; participated in sprint planning, code reviews, and CI/CD pipelines
- Developed AI-driven data processing pipelines by integrating machine learning models with scalable back-end architectures
- Collaborated with cross-functional teams to deliver production-ready features while maintaining high code quality standards

Tunisie T'el'ecom, Tunis, Tunisia

Mobile Application Developer

Jul 2023 – Aug 2023

- Developed an Android application using Java and XML, implementing backend logic and designing intuitive UI/UX features
- Applied Material Design principles and collaborated with senior developers to ensure code quality and best practices

EDUCATION

University of Bremen, Germany

2022 – 2027

PROJECT

Workify

Jan 2026 – May 2026

- Developed an AI-powered freelancing platform connecting freelancers and clients through intelligent project matching
- Integrated NLP and machine learning models for skill extraction, requirement analysis, and recommendation systems
- Implemented core features including real-time messaging, project management, ticketing, secure payments, and certifications
- Designed scalable REST APIs and modular backend architecture using Angular and Spring Boot
- Selected among the best engineering projects at ESPRIT University
- Tech Stack: Angular, Spring Boot, REST APIs, NLP/ML, MySQL, Docker, Jira, Git

LabTrack Pro

Aug 2025 – Present

- Extended a laboratory management platform focused on scientific workflow automation and sample traceability
- Built automated analysis pipelines integrating NMR, GC-MS, and PCA processing workflows
- Developed quality scorecards and secure blockchain-based batch certification features
- Centralized laboratory data management to improve usability, traceability, and analytical efficiency
- Tech Stack: FastAPI, Python, Svelte, SQLite, Scikit-learn, Blockchain, Git

NMR-GA

Jun – Jul 2025

- Developed a Python toolkit for NMR spectral analysis using genetic algorithms
- Optimized signal fitting and concentration estimation for complex spectral datasets
- Improved robustness and automation of quantitative chemical data analysis workflows
- Tech Stack: Python, NumPy, SciPy, Genetic Algorithms, NMR ProcessingTbibi Feb – May 2025
- Developed a medical consultation and appointment management platform for patients and doctors
- Implemented role-based authentication, scheduling systems, and secure REST APIs
- Integrated Google Meet API for remote medical consultations and telemedicine support
- Built both web and desktop application modules using Symfony and JavaFX
- Tech Stack: Symfony, JavaFX, PHP, Java, REST APIs, Google Meet API

Alemni

Feb – May 2024

- Built an e-learning platform supporting course management and digital learning workflows
- Developed authentication systems, document sharing features, and database integration
- Integrated an AI-powered chatbot to assist learners and improve user engagement
- Tech Stack: PHP, JavaScript, HTML/CSS, MySQL

SKILLS

- Web Development: JavaScript (Angular, Svelte), PHP (Symfony), Java (Spring Boot), HTML/CSS, Python (FastAPI), Shell Scripting
- Mobile Development: Java (Android), Dart (Flutter, FlutterFlow)
- Desktop / GUI: C++ (Qt), Java (JavaFX)
- Databases: SQL (MySQL, PostgreSQL, Oracle), NoSQL (MongoDB, Neo4j)
- Cloud & DevOps: Azure, AWS (basics), Docker, Kubernetes, Jenkins, CI/CD
- Methodologies & Tools: Agile, Scrum, Git, GitHub, MySQL Workbench
- Operating Systems: Linux (Ubuntu), Windows
- CERTIFICATIONS MongoDB Aggregation Fundamentals Jan 2026 Graph Data Modeling– Neo4j Dec 2025 Neo4j Graph Data Science Dec 2025 Cypher Fundamentals– Neo4j Dec 2025 Neo4j Fundamentals Nov 2025 Intro to AI– 365 Data Science Nov 2025 AI Model Deployment on AWS– 365 Data Science Nov 2025 Languages
- Arabic – C2 (Native)
- English – C1 (Professional)
- French – C1 (Professional)
- German – A2 (Currently improving)
